

# HIGH-SPEED ETHERNET OPTICS

11<sup>TH</sup> EDITION | MARCH 2021

**Table of Contents**

Table of Contents.....2

Abstract.....4

Executive Summary.....5

Chapter 1: Data Center DrivinG Forces .....9

    The data center big picture ..... 9

    Inside the data center – Continuous Change ..... 11

    The Flat Data Center..... 12

Chapter 2: High-Speed Interconnects in Constant Transition ..... 16

    Server speed drives data center OPTICS EVOLUTION ..... 16

    Switches – Supporting faster and larger networks..... 17

    New Switch ASICs are Supporting High-Radix 100GbE Networks ..... 23

    Powerful servers plus virtualized everything limits server growth..... 27

Data Center Topology and Cabling Varies..... 28

    Hyperscale Data Centers: What we know ..... 30

    Cable Lengths in Data Centers..... 37

Chapter 3: Datacenter Optical “Speeds and Feeds” ..... 45

    It’s all about the SerDes; the per-lane speed ..... 45

    The “N x Z” Rate Paradigm..... 45

    Ethernet Physical medium dependent (PMD) Variants ..... 47

    VCSELs at 25Gb/s, 50Gb/s and beyond ..... 53

Chapter 4: Forecast Methodology ..... 56

    Data traffic growth in mega-datacenters..... 56

    Forecast Assumptions..... 57

    Forecast Accuracy..... 59

Chapter 5: Market Forecast for Ethernet Transceivers ..... 62

    Market Forecast for 25G and 50G transceivers ..... 68

    Market Forecast for 40G transceivers ..... 72

    Market Forecast for 100G transceivers ..... 73

Market Forecast for 200G and 400G transceivers .....	76
Beyond 400G .....	84
APPENDIX 1: Ethernet Roadmap .....	86
The 2020 Ethernet Alliance Roadmap.....	86
Beyond 400G Ethernet.....	89
Multi-Source Agreements (MSAs) for Ethernet PMDs .....	93
Appendix 2: Form Factor MSA Madness .....	99
LightCounting view of form factor evolution.....	110
Two-in-One (2:1) Dual Modules: What and Why?.....	113
New Senko SN and US Conec MDC Connectors facilitate easy breakout applications .....	115
Appendix 3: Ethernet PMD Variants Described .....	118
25G Transceivers .....	118
40G Transceivers .....	118
50G Transceivers .....	123
100G Multimode Transceivers .....	124
Single-Mode Fiber 100G Transceivers .....	126
200G Transceivers.....	134
400G Transceivers.....	135
400G Single-Mode Transceivers .....	137
New 'Beyond 10K' Ethernet IEEE solutions .....	139
Appendix 4: Electrical Interfaces for Optical Modules.....	141
IEEE Attachment Unit Interfaces (New Nomenclature).....	141
Optical Internetworking Forum Interface Agreements.....	143
